Abstract: The present invention relates to a system for purifying rinsing water for washing machine and its rinsing control method. Said invention includes: water storage tank, washing tank, electrocoagulator, magnetic separation device and secondary supplying device. The electrocoagulator can coagulate the heavy metal and other matter being in rinsing water, the magnetic separation device can separated the floc coagulum formed on the electrocoagulator from rinsing water and the secondary supplying device can be used for transferring the rinsing water into water storage tank for reuse.
